

## The PULSOVET™ 3000-DS Advantage

### ➤ Exceptional Portability Permitting Omnipresence

- Compact electrocardiogram-stethoscope combination product designed to complement the standard office based ECG machine and to be carried around as easily as a standard mechanical stethoscope.
- Weight comparison:
  - PULSOVET 3000-DS about 200 g (7.1 oz);
  - Standard mechanical stethoscope about 150 g (5.3 oz).
- Detachability of the PULSOVET head (comprising electrocardiogram and stethoscope) from stethoscope tubing.

### ➤ Simplify ECG Recording

- Use of the 3-lead ECG cable with the special soft clips (designed to not twinge the animal's skin)
- Ideally suited for time effective and precise cardiac assessment.
- High accuracy of the ECG tracing featuring Micro Recording Technology (MRT).

### ➤ Highest Standards of Manufacturing and Quality Control

- *Swiss Made* precision product, manufactured and quality controlled based on zero error tolerance.
- One-year warranty against defects in material and manufacture.

### ➤ State-of-the-Art Technical Performance

- High-resolution display of recorded ECG tracings on the LCD display, including:
  - Freeze function;
  - Storage (up to 99 individual ECG tracings for a total of 16 min.) and recall function;
  - Audio/Alarm function.
- Automatic voltage amplification of recorded ECG tracings on the LCD display with normometric display of downloaded ECG records on the PC.
- Automatic pacemaker detection.
- Does not require any calibration or tuning. It contains no operator serviceable components.
- PULSOVET PC software for PC downloading of saved ECG tracings and PC-based printing and/or faxing/electronic mailing of downloaded ECG records.
